Culture

It is a mistake to assume that because iris are extremely hardy that they will not respond to a careful cultural plan. Above all, iris must have full sun and good drainage—given such conditions many of your iris troubles will be averted. Keep all dead leaves and litter removed—these breed disease. Iris will thrive in any ordinary garden soil. A good plan for the fertilizing of iris is to apply gypsum or lime in the spring, superphosphate after blooming, and a feeding of bone-meal in the fall. Larger blooms and more vigorous plants will be your reward.
